

Resilience and Emergency Management Solutions

Our communities face an unprecedented amount of risk, from intense climate events to emergencies that threaten our economy, environment, communities and way of life. While we can't predict what the future holds, we can become more resilient and be better positioned to prepare for, withstand and recover from challenging conditions.

The Michael Baker International and Tidal Basin team offers comprehensive program management consulting services. Our relationship pairs the depth and breadth of Michael Baker's risk-resilient planning, engineering design and construction services with Tidal Basin's integrated technology, resilience and emergency management solutions.

Combined Capabilities

This combination of capabilities provides a full continuum of services, from pre-crisis planning and resilience solutions to post-disaster response and recovery grant, and infrastructure program management accompanied by full-service design, engineering, construction and technology solutions. This spectrum of pre- and post-disaster consulting services transforms and empowers organizations and communities to become more resilient and stronger than before.
