

Grants Management, Subrecipient Oversight, and Resiliency Program Support

Tidal Basin has more than 35 years of experience managing some of the largest community development, mitigation, and resiliency programs in the country. We have worked in all areas of resiliency program design and delivery, including subrecipient management and oversight. Our experts have supported community resilience through structural improvements and social programming.

Tidal Basin services include:

- Program guideline development and standard operating procedure support
- Application design support
- Thoughtful and targeted scoring criteria development
- Technical assistance on both state and local levels
- Application review, award, and grant agreement support

Our subrecipient management services include:

- Technical assistance for application development and planning phases
- Training on programmatic and regulatory requirements
- Procurement review
- Environmental review support
- Milestone and schedule management
- Construction management/oversight
- Documentation management
- Payment review and processing
- Compliance and monitoring
- Closeout

Housing

Community
Development

Infrastructure

Tidal Basin's resiliency programs and clients include:

New York City Housing Authority (NYCHA) - Retrofits

Supported NYCHA in submitting proposals and retrofitting community centers with mitigation measures such as dry floodproofing, generator connections, and more following damage from Hurricane Sandy.

Red Cross - Community Programming

Tidal Basin's team includes members with robust experience assisting community centers in meeting the requirements to become Red Cross Shelters, points of distribution (PODs), or other "whole of community" approaches to disaster response.

Workforce Development Programming

Supported New York City and Hendry County, Florida, in the administration and oversight of successful grant-funded workforce development programs designed to increase social resilience in the community.

Florida Department of Economic Opportunity (DEO) - Technical Assistance

Supported the Florida DEO in providing local communities with technical assistance for grant application development. This included LMI mapping, census tract analysis, Hazard Mitigation Plan review, and overall project design.

California Action Plan

Supported the state of California in designing \$1 billion+ of CDBG-DR grant funded program, providing needs assessments and stakeholder engagement activities throughout the state.

West Virginia Mitigation Action Plan

Partnered with the state of West Virginia to develop a plan for a \$179 million CDBG-Mitigation Grant. We provided program design, application criteria development, program implementation tools, guidelines, public hearing and stakeholder engagement, as well as technical assistance to the state.
